Stardust

## Eight Universe DMX/RDM transmitter with Ethernet, WiFi and Bluetooth

Stardust is the problem solver for the most demanding users and situations. Featuring eight universes of CRMX and multiple connectivity options, it is the most sophisticated Wireless DMX system on the market. With the introduction of Cognitive Coexistence with Fleet Alliance it has the reliability you've come to trust, with the universes you need.

Tailor your equipment to meet your specific needs with accessories such as V-Lock battery mount, rack mount, and wall mount.
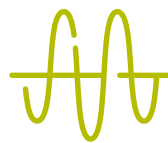

Fleet Alliance enables expansion of your universes beyond eight as the transmitters automatically can coordinate the spectrum, providing many more universes without the need for frequency planning.

Linking Key encrypts the CRMX transmission with user specified keys, making it possible to move between CRMX networks in a completely new, smooth, way.
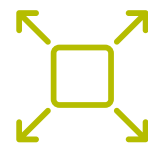

- Eight universe CRMX transmitter
- DMX/RDM, sACN and Art-Net 1-4
- Ethernet, 5 GHz WiFi and Bluetooth
- Configuration via web portal, app or front panel
- Compatible with CRMX and W-DMX G3/G4s

Stardust Specifications

Supported Protocols	RF Characteristics	Connectors	Power	Physical
DMX / RDM	Frequency: 2402-2480 MHz	Ethernet: RJ45	PoE IEEE 802.3at	IP20 Aluminium enclosure
sACN / Art-Net 1-4	Built on TimoTwo	Antennas: 2dBi RP-TNC	DC 10-20 V	Color screen and rotary knob
CRMX	Fixed 5ms latency	DC: 2.5mm/5.5mm Barrel	Backup battery (15 minutes)	M10 and 3/8" Threads
W-DMX G3 / G4s	128-bit encryption	AC: powerCON TRUE1	AC 100-240 VAC	Accessories for V-lock battery-,
Ethernet	Forward Error Correction			rack- and wall mount.
WiFi 802.11b/g/n/ac				
Bluetooth 5.0

Aurora
Single universe DMX/RDM transceiver with WiFi and Bluetooth

Aurora is the flexible unit able to transmit or receive one universe of DMX/RDM with several connectivity options. Using the intuitive color screen to change settings on the fly and move between universes, it is powerful enough for single universe transmissions as well as being a receiver packing the most advanced features

FEATURES
- Single universe CRMX Flex unit
- DMX/RDM, sACN and Art-Net 1-3
- 5 GHz WiFi and Bluetooth
- Configuration via app or front panel
- Compatible with CRMX and W-DMX G3/G4s

SINGLE UNIVERSE FLEX   **COGNITIVE COEXISTENCE**   **COLOUR SCREEN**

Luna
Single universe DMX transceiver with Bluetooth

Luna is the essential flex unit that gets the job done, being able to transmit DMX or receive DMX/RDM for one universe. Featuring the same reliable CRMX as all other devices from LumenRadio it also features Bluetooth connectivity in a compact and rugged format.

FEATURES
- Single universe CRMX Flex unit
- DMX/RDM (in RX)
- Bluetooth
- Configuration via app
- Compatible with CRMX and W-DMX G3/G4s

SINGLE UNIVERSE FLEX   **COGNITIVE COEXISTENCE**   **BLUETOOTH**

![lumenradio logo]

With groundbreaking patented Cognitive Coexistence technology, our CRMX™ technology for wireless DMX offers unprecedented reliability and has become the de-facto wireless lighting control standard across the globe.
