Luminex
NETWORK INTELLIGENCE

LumiNode / LumiCore
RELEASE NOTES

VERSION 2.4.1

MADE IN BELGIUM

DOCUMENT INFORMATION

With v 2.4.1 Luminex brings improvements to the LumiNode range for increased stability.

FIXES & IMPROVEMENTS

- Fixed a bug where LumiNode could not be upgraded (without a reboot) after it has been continuously in operation for more than 10 days.

- Fixed an issue where the networking configuration could not be changed.

- Fixed an issue where configuration was not always saved to the memory.

- A validation of network gateways was implemented to now check that the gateway is part of the local network.

- An issue was fixed where mDNS packets were no longer sent out after a change in the IP address or netmask was made.

- Fixed an issue where the firmware upgrade process sometimes made excessive use of memory.
